

IX. B) Transportation Plan Resolution

This Resolution supports an updated Transportation Plan for Luray. We last adopted such a resolution in November 2013, although we did make a few minor changes to update the plan in 2015.

Viable transportation plans are becoming increasingly important in terms of being eligible for state and federal monies. We intend to incorporate this plan (mostly by reference) into our Comprehensive Plan 2018 that is currently being reviewed for update.

This plan only lists priority projects by type, and does not contain construction estimates or timeframes for completion. All such projects depend on the availability and allocation of funds. Pursuing such VDOT grant funds and related federal grant funding will enable us to complete these projects at a much higher rate than on simply waiting on base state funding programs.

Based on VDOT review, the plan itself may need minor modifications, but these will not require a new Resolution by the Town.

Operationally, the Town implements projects based on prioritization and available funds.

We recommend approval of the Resolution.
